

Conversation with clients

This document extracts and refines useful information from the meeting minutes and presents it in a format of Q&A.

1. Where do you expect to be able to access this eportfolio system? Do you want to access it on Android/IOS mobile phone?

- Being able to access the system on PC is enough.

2. Do you want to view other users' eportfolios or do you want your eportfolio be viewed by others? Do you want to contact others by this system?

- We want the functionality of viewing others' eportfolios.
- It would be nice if I can see the most popular eportfolio.
- Contact details (e.g. phone number, email) can be included but a contacting interface is not what we demand.

3. Despite some basic CRUD functionalities, what else do you wish to have?

- I want to be able to download any eportfolio.
- I want to be able to generate a hyperlink of any eportfolio.
- I want to be able to navigate, i.e. moving quickly to any section.
- I want to have some personalised options.
 - I want to be able to choose different font sizes/colors.
 - I wish I could choose from a number of templates in which my files can be presented.

4. What is the general UI style and background color you wish to have?

- I want UI to be simple and handy.
- I want the background colour to be comforting. (i.e. good combination of colour or use of some warm colours)

5. What do you expect to include in your eportfolio?

- I want my eportfolio to include the following information:
 - Personal details: name, gender, DoB, address/location, contact details (phoneNo, email address)
 - Education background: institution, major, degree, results
 - Self-introduction/profile
 - Personal website link (e.g. LinkedIn, GitHub, blog entries)

- Personal files (WAM file, graduation certification, scholarship evidence, internship certification, participated projects)
- Project/works (code, multimedia, images)
- Personal photo
- Working/Internship experience
- Contact details
